

Role-based tech training and certifications – *the secret to business success*

In a rapidly evolving technological landscape, digital transformation continues to introduce innovative tools that drive productivity, minimize costs, expedite results, and deliver enhanced solutions to customers. To remain at the forefront of value delivery, continuous learning is imperative for businesses and their employees as technology evolves.

Microsoft training and certification empowers organizations to unlock the capabilities of technology by ensuring that team members are equipped with skills and knowledge of next-generation solutions. Microsoft's role-based training and certifications can advance employee talent and career growth while enabling companies to achieve their digital transformation objectives.

With over 25 years of partnership with Microsoft, Skillsoft Global Knowledge has achieved the highest designation in

Microsoft's Solutions Partner program by successfully completing all six badges. This accolade underscores our proven capabilities in delivering high-quality, scalable solutions to customers worldwide.

OUR MICROSOFT COURSE OFFERING

Instructor-led Training (ILT)

Attend virtual or in-person training taught by Microsoft Certified Trainers (MCT's). We also provide private classroom (virtual or onsite), tailored to meet your teams needs.

Self-paced Learning

Build practical job skills with easily accessible self-paced courses.

Unlimited Learning Subscriptions

You can also combine both ILT and self-paced learning when subscribing to our year-long Elite Total Access Collection for Microsoft and GK Polaris subscriptions.

Microsoft Training Events

You can choose free one day Microsoft Fundamental Days, Microsoft Exam Prep 'deep dive' events (with access to hands-on labs) or live and on-demand webinars.

MICROSOFT CREDENTIALS

Take charge of your career and become indispensable. From role-based certifications to new, scenario-specific applied skills, showcasing your proficiency with industry-trusted and verified credentials from Microsoft helps make you essential at your current workplace—and the next one.

CERTIFICATION

Microsoft certifications are industry-recognized credentials that validate an individual's expertise in various Microsoft technologies and domains, including cloud computing, data management, cybersecurity, application development, and more.

Earning Microsoft certifications allows IT professionals to demonstrate proficiency in leveraging Microsoft tools and technologies to solve complex business challenges.

CERTIFICATION LEVELS

Fundamentals

Microsoft fundamentals curriculum provides foundational-level knowledge of Microsoft cloud and business application services. They are ideal for students who are starting or who are thinking about starting a career in technology.

Role-based

Whether you're new to the field, or a seasoned professional, Microsoft's role-based training and certification will help you keep pace with today's business requirements.

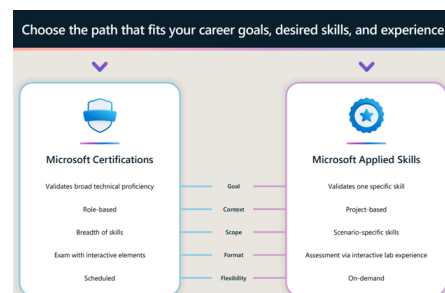

Specialty

By earning a Microsoft Specialty certification, it demonstrates you have advanced knowledge in key Microsoft technologies and role-based skills.

APPLIED SKILLS

Applied Skills, the new scenario-based credential that proves your proficiency in **skill sets specific to critical business problems** so individuals can make a bigger impact on projects, their organization, and career.

Now available as Instructor-led Training courses!
